

# Lightweight components for automotive & transport

We make aluminium smarter.

apt for e-mobility and sustainability - with the latest technologies and fully automated processes. apt manufactures lightweight components for you and develops aluminium components for the automotive and transport industry with you.

## Facts and figures

4 Production sites

**2 × Germany**  
**1 × The Netherlands**  
**1 × Czech Republic**

apt Customers

**OEMs,**  
**as well as Tier 1-n**

Center of Excellence

- Development
- Co-engineering
- From concept to final serial part

Your one-stop-shop

- Anodizing
- Powder coating
- Passivation
- Sawing, drilling
- Stretch bending
- 3-5-axis milling machines
- MIG/MAG and FSW welding
- Bonding
- Assembly

Employees

**≈ 1,000**

Production capacity p. a.

**80,000 t**

Traceable supply chain

**From billet to final part**

## Smart solutions for complex applications

### Automotive

- Battery housings and sub-assemblies
- Car roof systems and guide rails
- Accessories
- Structural components
- and much more

### Transport

- Truck trailers
- Car trailers
- Battery housings and sub-assemblies
- LiteFlap® (bus flap)
- Door frames for bus and rail
- and much more

## Our commitment to sustainability

**apt Agenda 2044**  
Alignment with the EU Green Deal 2050 and the goals of the UN 2030 Agenda.

**Recycling**  
We recycle 18,000 tons of aluminium scrap per year in our remelting plant.

**<4 t CO<sub>2</sub> / t Al**  
Purchase of primary material primarily from recycled production.

Use of green electricity in production.

**Engagement**  
Membership of:

- Aluminium Stewardship Initiative (ASI)
- EcoVadis
- Circular Valley
- European Aluminium
- Aluminium Germany

EN ISO 9001 : 2015  
EN 15088  
EN ISO 14001 : 2015
